credit information

# Graydon International: helping you manage credit risk

Your one-stop-shop for worldwide  
business credit information

Would you take the risk of doing business on an open account in a new, unfamiliar country with new business partners? Graydon International removes the worry by providing online business credit reports. Imagine the benefits of a one-stop-shop for credit information around the world!

## Global services

Graydon International is a subsidiary of the Graydon Group and responsible for marketing and sales of international business credit information. The Graydon Group is owned by three of the world's leading credit insurance organizations: Atradius, Coface and Euler Hermes.

Our network spans the globe to supply you with business credit information from any country in the world. Our sales agents provide you with the best customer service possible, wherever you are.

## The ease of online business credit reports

Our online business credit reports provide the following benefits:

- ▶ **An instant online snapshot** of your customer's credit risk: risk category, credit recommendations, a financial summary, balance sheet and much more
- ▶ **Millions of online credit reports** in over 130 countries. Fresh investigations available for any country in the world.
- ▶ **Multilingual customer service** for all major world languages across many time zones (including Asian and North American time zones)
- ▶ **A uniform report format** for each country
- ▶ **No up-front fees:** no units to buy, no subscription fees, no commitment required
- ▶ **Economical:** the cost of a credit report is less than the cost of several weeks interest on a major outstanding invoice

### Solutions: automating your credit data handling

In addition to credit reports, we offer solutions for automating the handling of credit information (by structuring it as XML data). XSellence is one such solution: a decision-making tool that speeds up your credit decisions for a large volume of clients and prospects. It also lets you manage portfolio risk. Visit our website or contact us for more information about XSellence and other solutions.

"We have been using Graydon International for the last year for our International accounts. We have found their service to be fast, friendly, and reasonably priced. We highly recommend Graydon International to anyone who is trying to enhance their credit management more effectively."

Patrick Spargur, Bally Technologies Inc., LasVegas, NV
